Who he is

James Pack is a company builder with more than forty years of entrepreneurial leadership across telecommunications, real estate and direct selling. He spent two decades as a sales and marketing executive in telecom, founded his own consulting firm, built and led development projects across Park City and the Salt Lake Valley — commercial and residential — and then partnered with Verdis Norton to co-found ASEA, commercializing a novel redox-signaling technology and growing it into a global direct-sales company: one of the hundred largest in the world, with revenue above one hundred million USD by 2014. He brings to Delta One the thing every distributor organization needs most at the start: someone who has already built one and scaled it internationally.
