DELTA ONE

The Momentum Plan Speaker Edition

Every slide with its sales notes — and Aria's narration attached to every page

FOR DISTRIBUTORS · OCTOBER 2026 · DRAFT FOR COMPLIANCE REVIEW

Hypothetical illustrations — subject to compliance approval

HOW TO USE THIS EDITION

Present from the slides. Sell from these notes.

The slides	The seventeen slides are the customer-side Momentum Plan presentation, exactly as prospects see them. Present from the PowerPoint or Keynote file; use this edition on your tablet or a second screen.
The notes	Under every slide: What to say — the script, written in the classic professional-selling style: lead with a question, state the benefit plainly, get agreement on the principle before the number, and ask for the next step. The principle — the one selling idea the slide puts to work. Welcome the question — the objection prospects raise on that slide, and the honest answer. Objections are buying signals: welcome them, answer them, and confirm.
Aria's narration	Every page carries Aria's narration of that slide as an attached audio file: click the paperclip icon beside 'Listen' (Adobe Acrobat, Preview and most desktop readers open it; on a phone, use the Attachments panel). The whole walkthrough, about 10 minutes, is attached to the document as one file for listening in the car.
The rules of the road	Read the disclosure on slide 16 in full, every time. Never quote a result you cannot show. Never promise a figure. Send the one-page Key Facts before the sale, not after. And only ever suggest an amount the prospect could afford to lose entirely.

The notes apply the principles of the professional-selling school associated with Brian Tracy; they are written for Delta One and are not his words.

Speaker edition — for distributors, not for prospects. Illustrations at the engine's 0.50–1.00% average daily result; days vary from zero to several percent. Not a guarantee of earnings. Capital at risk.
Draft for legal and compliance review. Result and income figures require compliance approval before external use. Not legal, tax or financial advice.

WHAT TO SAY

Thank you for giving me fifteen minutes. Let me ask you a question before we begin: if you could see exactly how a plan pays, every rule, every number, before you put in a single USDT, would that be worth fifteen minutes of your time? Good. That's what this is. I'm going to show you what Delta One is, how the Momentum Plan pays you two ways, what each rank requires, and the rules that keep it honest. And I'll tell you the one thing most presenters won't: every figure you see is an illustration at the engine's average daily result. Real days vary, and nothing here is guaranteed. Fair enough? Then let's begin.

THE PRINCIPLE

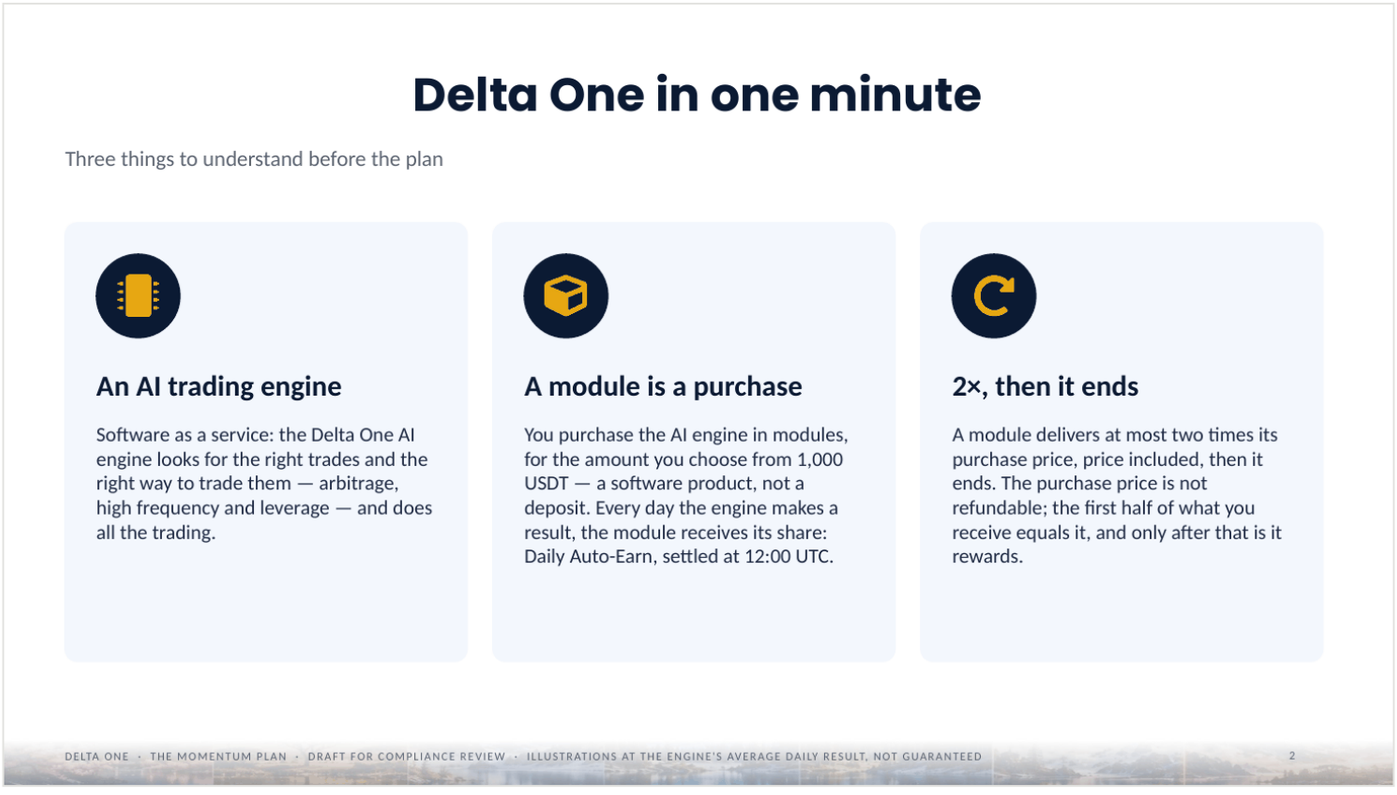

Open with a question, earn permission, and set the honest frame yourself before anyone has to ask for it. People buy from people they trust.

WELCOME THE QUESTION

“Is this an investment?” Good question, and the answer is no. You purchase a software product: a module of the Delta One AI trading engine. The engine does the trading, and your module pays you a share of what it makes until it has delivered twice the purchase price. Then it ends. Would it help if I showed you exactly how a module runs?

LISTEN

Aria narrates this slide · 35 s — click the paperclip (attached MP3)

WHAT TO SAY

Here is Delta One in one minute, and I'd like you to remember three things. One: Delta One is an AI trading engine, software as a service, that looks for the right trades across arbitrage, high frequency and leverage, and does all the trading itself. Two: you purchase that engine in modules, for the amount you choose, from one thousand USDT. Three: a module delivers at most two times its purchase price, price included, and then it ends. The first half of what you receive equals what you paid; everything after that is rewards. Simple, specific, and written down. Which of those three would you like me to go deeper on?

THE PRINCIPLE

Three points, numbered, in plain words. The confused mind says no; the clear mind asks the next question.

WELCOME THE QUESTION

“Can I get my purchase price back?” Not separately, and I want to be straight with you about that. It comes back as the first half of the module's results. If the engine stops earning, what has not been paid is not owed. That is why we only ever recommend an amount you could afford to lose.

LISTEN

Aria narrates this slide · 36 s — click the paperclip (attached MP3)

WHAT TO SAY

Follow the money with me. Every hundred USDT of trading profit is shared three ways. Fifty goes to members as their modules' daily results. Twenty five goes to the compensation plan, and here is the key: every commission in the Momentum Plan comes out of that twenty five, never out of anyone's purchase. Twenty five goes to the DAO Treasury. And on a day with no trading profit? Nobody is paid. No profit, no payout. Now let me ask you: does it make sense to you that a commission should only ever come from profit the engine actually made that day?

THE PRINCIPLE

Let the prospect say yes to the principle before you show them a number. Agreement on principle makes the numbers credible.

WELCOME THE QUESTION

“Where does my commission come from if nobody new joins?” From the twenty five USDT of every hundred of trading profit. New members add volume, but the money itself is trading profit, which is exactly why a day without profit pays nobody. Would you want it any other way?

LISTEN

Aria narrates this slide · 32 s — click the paperclip (attached MP3)

WHAT TO SAY

This is the most important slide in the presentation, so I'm going to slow down. Half a percent a day is the engine's average daily result, and it is the rate behind every figure you'll see. It is an average, not a daily promise. Some days the engine produces nothing. Other days, several percent. So every figure here is an average over time, not what any one day pays. The average itself can change, and nothing is guaranteed by Delta One, a bank, or any government scheme. I tell you this first because I'd rather you hear it from me now than wonder about it later. Can we agree that every number from here on is an average?

THE PRINCIPLE

Say 'average' out loud, every time, and get agreement. The credibility you build on this slide is what closes on slide seventeen.

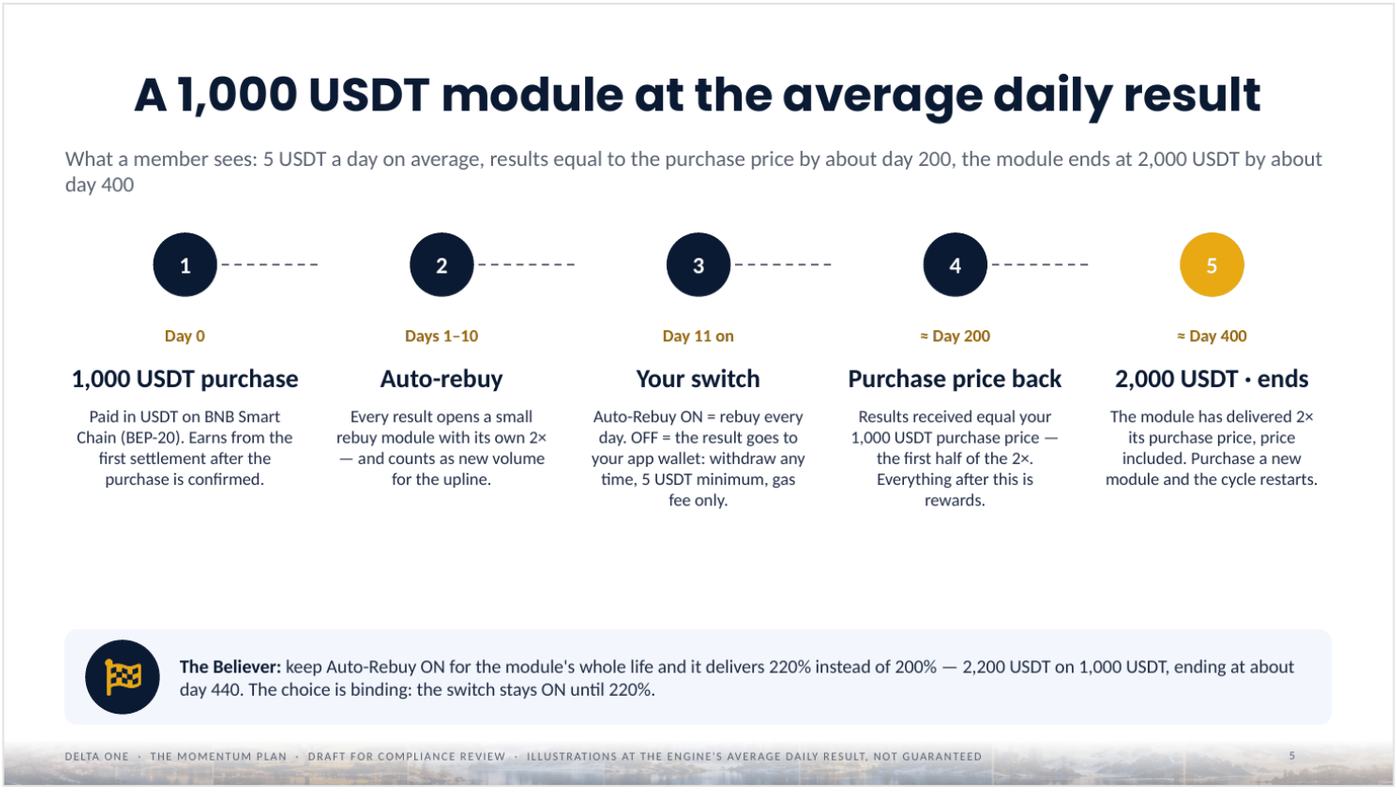

WELCOME THE QUESTION

“What did it make last month?” I'll only quote what I can show you. Ask me for the published trade reports and read them yourself. What I will never do is promise you a figure, because nobody honest can.

LISTEN

Aria narrates this slide · 35 s — click the paperclip (attached MP3)

Speaker edition — for distributors, not for prospects. Illustrations at the engine's 0.50–1.00% average daily result; days vary from zero to several percent. Not a guarantee of earnings. Capital at risk.
Draft for legal and compliance review. Result and income figures require compliance approval before external use. Not legal, tax or financial advice.

WHAT TO SAY

Let's walk one module through its life, step by step. A one thousand USDT module at the average earns five USDT a day. For the first ten days, every result automatically opens a small rebuy module, each with its own two times. From day eleven, your own switch decides: rebuy, or send the result to your app wallet, where you can withdraw any time from five USDT. By about day two hundred, your results equal your purchase price. By about day four hundred, the module has delivered two thousand USDT, and it ends. And a Believer, someone who keeps the switch on for the whole life, receives two hundred and twenty percent instead. Which of those five steps would you like me to explain again?

THE PRINCIPLE

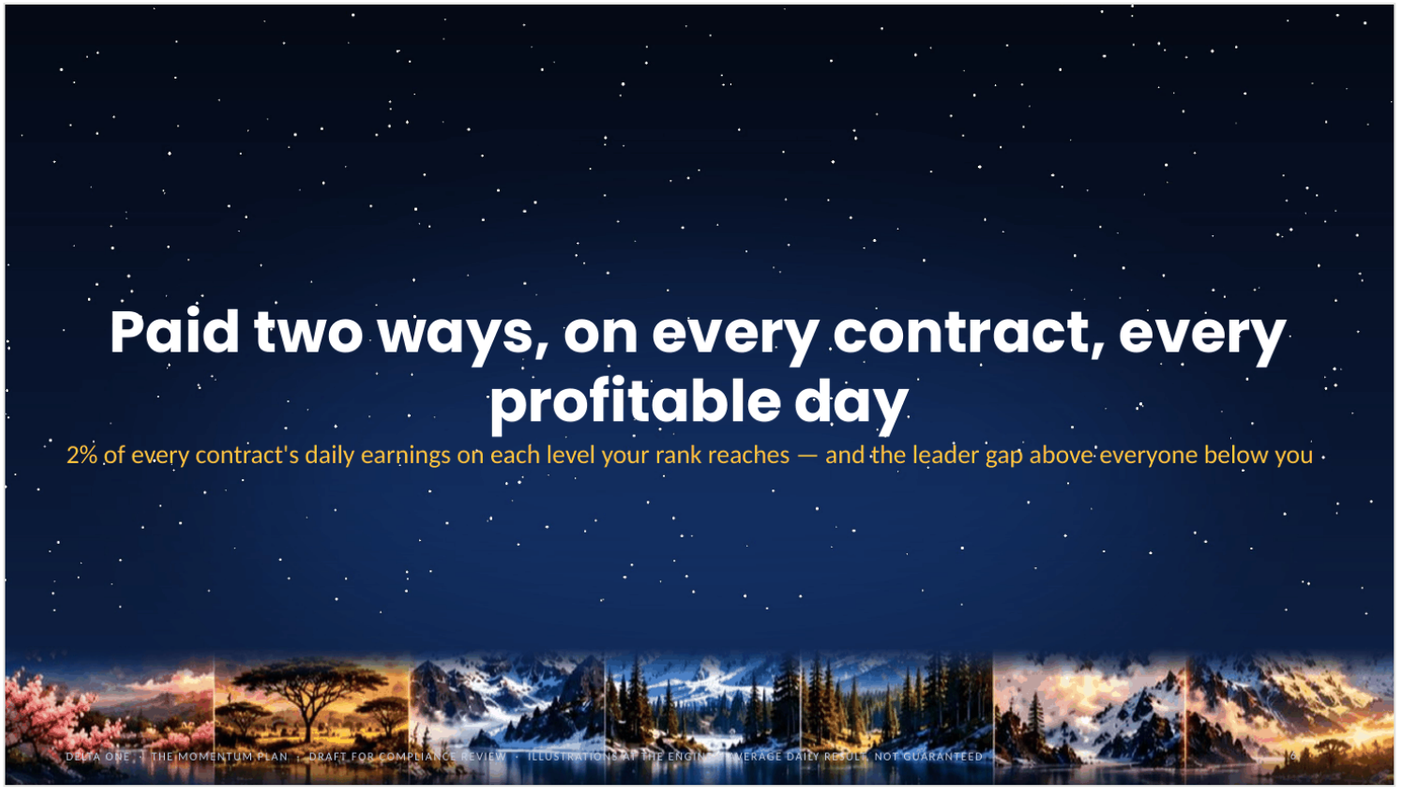

Walk the timeline slowly, in order, and invite the question. The first ten days and the day-eleven switch are where buyers hesitate; clarity here removes the hesitation.

WELCOME THE QUESTION

“Can I stop early and take my purchase price out?” No, and I'd rather you know that now. A module cannot be cancelled before two times; only results can be withdrawn. That is the trade: no early exit, in exchange for a module that keeps paying until it has delivered two times.

LISTEN

Aria narrates this slide · 42 s — click the paperclip (attached MP3)

WHAT TO SAY

Now the plan itself, and here's where it gets interesting for a builder. You are paid two ways, on every contract in your organization, every profitable day. First, the base matrix: two percent of every contract's daily earnings, on each level your rank reaches. Second, the breakage differential: the leader gap above everyone below you. One pays everybody who qualifies. The other pays the people who build. Let me take them one at a time, and you tell me which one you'd build for.

THE PRINCIPLE

Name the two streams, then ask which one they'd build for. The answer tells you how to present the next five slides.

WELCOME THE QUESTION

“Is this a pyramid?” I'm glad you asked, because I'd ask too. Nobody here is paid for recruiting. Every commission is a percentage of what a contract earned that day from trading, and a purchase price pays nobody. Most members earn no commission at all, and the rewards disclosure says so in writing. Would you like to see that page?

LISTEN
Aria narrates this slide · 27 s — click the paperclip (attached MP3)

Speaker edition — for distributors, not for prospects. Illustrations at the engine's 0.50–1.00% average daily result; days vary from zero to several percent. Not a guarantee of earnings. Capital at risk.
Draft for legal and compliance review. Result and income figures require compliance approval before external use. Not legal, tax or financial advice.

WHAT TO SAY

The base matrix first. Every qualified upline receives two percent of each contract's daily earnings, on every level their rank reaches: three levels at Fuji, twenty one at Everest. A ten thousand USDT contract earning fifty USDT a day pays each qualified upline one USDT a day, thirty a month. It is capped per day by rank. Now the breakage differential, the part built for leaders. Each rank has an entitlement, from six percent to forty two. On every contract, after the base is paid, you receive the gap between your entitlement and the highest entitlement already claimed below you in that line. It is not capped, and it has no depth limit. Do you see why a leader who stays ahead of their lines is paid on all of them?

THE PRINCIPLE

Base matrix: small, certain, capped. Differential: uncapped and earned by leading. Sell the second to builders, the first to everyone.

WELCOME THE QUESTION

“Why only two percent per level?” Because it is two percent of earnings, every single day, not two percent of a purchase once. Rewards comes from volume: a million USDT of modules inside your paid levels is a hundred USDT a day from the base matrix alone, before the differential.

LISTEN

Aria narrates this slide · 43 s — click the paperclip (attached MP3)

Seven ranks, named after mountains

Three steps to qualify: your own purchase, your personal enrollments and your qualifying volume — counted line by line

Rank	Own purchase	Enrolled	Qualifying volume	Max per line	Paid levels	Entitlement	Daily cap (base)
1 · Fuji	1,000 USDT	2	2,000 USDT	50% · 2+ lines	1–3	6%	1,000 USDT
2 · Kilimanjaro	2,500 USDT	3	5,000 USDT	50% · 2+ lines	1–6	12%	2,000 USDT
3 · Matterhorn	6,000 USDT	4	12,000 USDT	33⅓% · 3+ lines	1–9	18%	3,000 USDT
4 · Denali	12,000 USDT	5	25,000 USDT	33⅓% · 3+ lines	1–12	24%	4,000 USDT
5 · Rainier	25,000 USDT	7	75,000 USDT	25% · 4+ lines	1–15	30%	5,000 USDT
6 · K-2	50,000 USDT	12	250,000 USDT	20% · 5+ lines	1–18	36%	6,000 USDT
7 · Everest	200,000 USDT	21	1,000,000 USDT	20% · 5+ lines	1–21	42%	7,000 USDT

Only active modules count toward qualifying volume. Ranks are rechecked at every 12:00 UTC settlement, so a rank is earned every day, not once.

WHAT TO SAY

Seven ranks, named after mountains, and every one of them has exactly three requirements: your own purchase, your personal enrollments, and your qualifying volume, counted line by line. Fuji needs a one thousand USDT purchase, two enrollments and two thousand of volume, and is paid on three levels. Everest needs two hundred thousand, twenty one enrollments and a million of volume, and is paid on all twenty one levels, with a forty two percent entitlement and a seven thousand USDT daily cap on the base matrix. And here's what I like about it: ranks are rechecked at every settlement. A rank is earned every day, not once. Where do you see yourself on this table in ninety days?

THE PRINCIPLE

Make the rank table personal. A goal with a date is the beginning of a plan; a table without a goal is just a table.

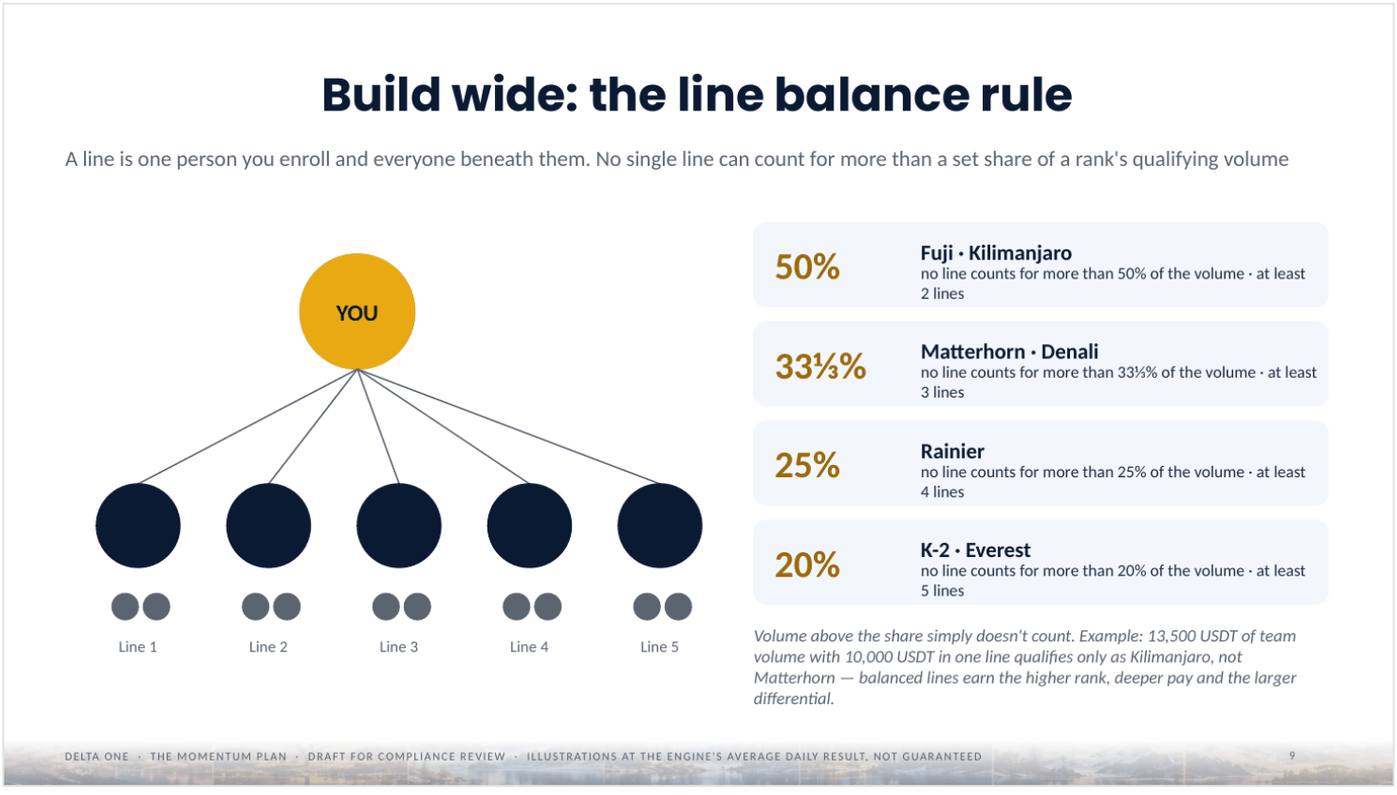

WELCOME THE QUESTION

“Does my own purchase count toward volume?” No. Your own purchase is checked separately against the rank's minimum, and qualifying volume is your downline. That keeps the rank honest: you rank on what your team builds, not on what you buy.

LISTEN

Aria narrates this slide · 39 s — click the paperclip (attached MP3)

Speaker edition — for distributors, not for prospects. Illustrations at the engine's 0.50–1.00% average daily result; days vary from zero to several percent. Not a guarantee of earnings. Capital at risk.
Draft for legal and compliance review. Result and income figures require compliance approval before external use. Not legal, tax or financial advice.

WHAT TO SAY

This is the rule that decides every rank, so please write it down. A line is one person you enroll and everyone beneath them. No single line can count for more than a set share of a rank's qualifying volume: half at Fuji and Kilimanjaro, a third at Matterhorn and Denali, a quarter at Rainier, a fifth at K two and Everest. Volume above the share simply doesn't count. Thirteen and a half thousand of team volume with ten thousand in one line qualifies only as Kilimanjaro, not Matterhorn. The lesson is one sentence: build wide, not just deep. How many lines do you think you could open in your first month?

THE PRINCIPLE

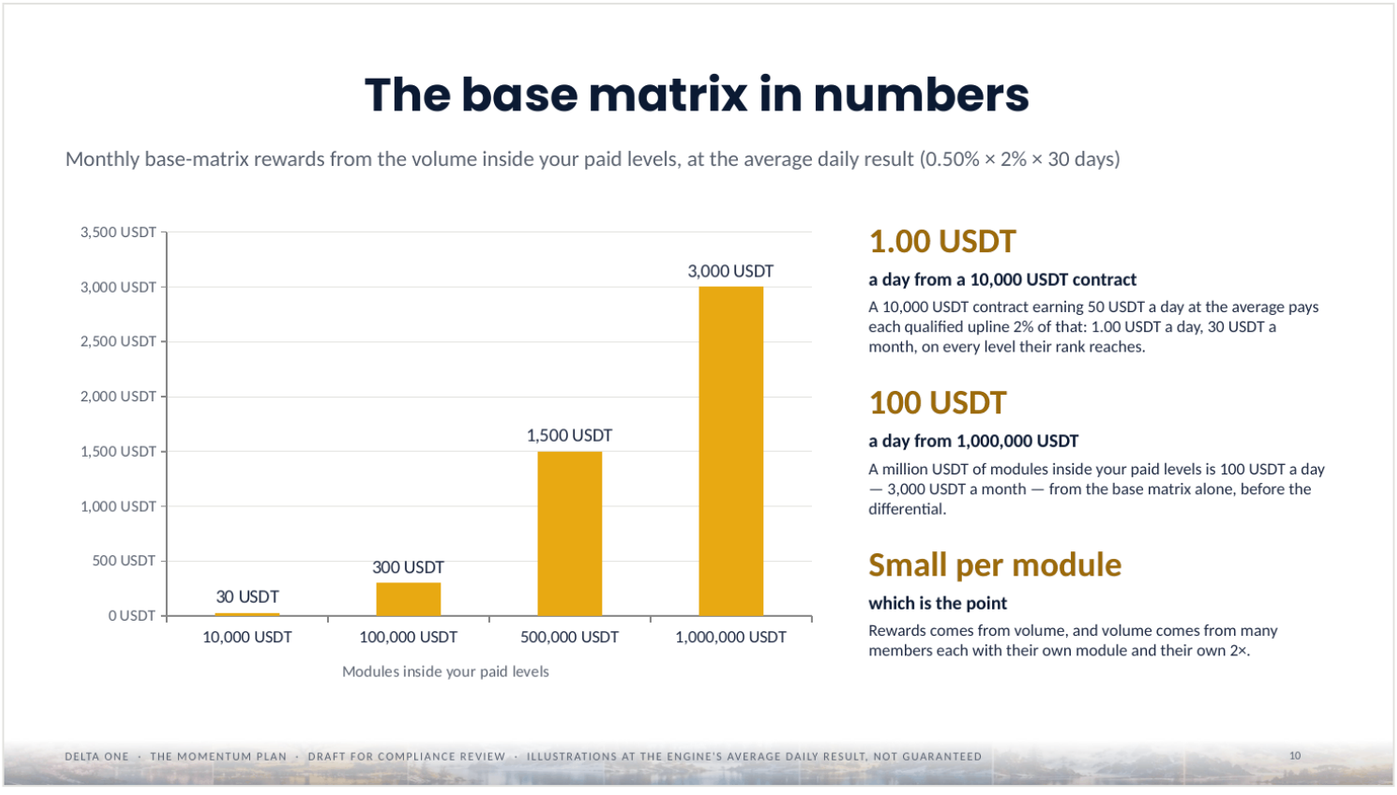

Teach the rule as the plan's built-in coaching: it rewards exactly the behaviour that builds a durable organization.

WELCOME THE QUESTION

“What if one of my people is a superstar?” Wonderful for them, and wonderful for you. Their line counts up to the share, and your differential on that line can still be large. To rank up, you need other lines. The superstar is a reason to build wide, not a reason to stop.

LISTEN

Aria narrates this slide · 36 s — click the paperclip (attached MP3)

WHAT TO SAY

Let's put the base matrix in numbers, because people decide on numbers. Ten thousand USDT of modules inside your paid levels is thirty USDT a month at the average. A hundred thousand is three hundred. A million is three thousand a month, a hundred USDT a day, from the base matrix alone, before the differential. Small per module, and that is exactly the point: rewards come from volume, and volume comes from many members, each with their own module and their own two times. So the question is never 'how big is one contract'. The question is 'how much volume is inside my paid levels'. What would a million USDT of volume look like in your network?

THE PRINCIPLE

Convert the mechanism into a goal the prospect can picture. People don't work for percentages; they work for a picture.

WELCOME THE QUESTION

“Is three thousand a month typical?” No, and I won't pretend it is. It needs a million USDT of active modules inside your paid levels, and most members earn no commission at all. It is what the arithmetic pays at that volume, at the average, no more and no less.

LISTEN

Aria narrates this slide · 40 s — click the paperclip (attached MP3)

WHAT TO SAY

Now the part the Momentum Plan was built for: the breakage differential. Here are the entitlements by rank, six percent at Fuji up to forty two at Everest. A worked example. You are a Denali at twenty four percent, at the head of a new line whose first leader below you is a Fuji at six. Nothing between you has claimed any of the gap, so you collect the whole eighteen points on every contract in that line. On a million USDT of modules in that line, at the average, that is nine hundred USDT a day, about twenty seven thousand a month, on top of the base matrix. And when someone below you reaches your rank, their part of the gap becomes theirs. So the plan rewards two things: opening new lines, and staying ahead of the people you lead. Which of those two comes more naturally to you?

THE PRINCIPLE

Show the mechanism, then the number, then the behaviour it rewards. A plan that rewards leadership sells itself to leaders.

WELCOME THE QUESTION

“What happens when my leader catches up to my rank?” Their part of the gap is theirs from that day, and they earned it. Your answer is the same as theirs was: keep ranking up and keep opening new lines. The plan keeps paying the person who keeps leading.

LISTEN

Aria narrates this slide · 45 s — click the paperclip (attached MP3)

Four organizations, worked to the USDT

Complete small organizations calculated with the same engine as every figure in the Delta One library — per month, at the average daily result

Scenario	Your purchase	Team volume	Lines	Your rank	Base / month	Differential / month	Total / month
A · Your first rank	1,000 USDT	2,000 USDT	2 × 1,000 USDT	Fuji	6.00 USDT	12.00 USDT	**18.00 USDT**
B · Building to Matterhorn	6,000 USDT	13,500 USDT	4 balanced lines	Matterhorn	40.50 USDT	284 USDT	**324 USDT**
C · Same team, one heavy line	6,000 USDT	13,500 USDT	10,000 USDT in one line	Kilimanjaro	40.50 USDT	202 USDT	**243 USDT**
D · A Denali with five lines	12,000 USDT	38,500 USDT	5 lines, each led by a Kilimanjaro	Denali	116 USDT	875 USDT	**990 USDT**

Compare B and C. Same 13,500 USDT of team volume. With 10,000 USDT of it in one line, only 4,000 USDT of that line counts toward Matterhorn, so you qualify as Kilimanjaro: fewer paid levels and a smaller gap. Balanced lines earn the higher rank, deeper pay and the larger differential. Your own module also earns its member result — 30 USDT a month on 6,000 USDT at the average — until it reaches 2×.

DELTA ONE · THE MOMENTUM PLAN · DRAFT FOR COMPLIANCE REVIEW · ILLUSTRATIONS AT THE ENGINE'S AVERAGE DAILY RESULT, NOT GUARANTEED 12

WHAT TO SAY

Four complete organizations, calculated with the same engine as every figure in the Delta One library, so there is nothing hidden. Scenario A, your first rank: a thousand USDT purchase, two people, Fuji, eighteen USDT a month. Scenario B, a Matterhorn with four balanced lines: three hundred and twenty four a month. Scenario C, the same team with ten thousand in one line: only Kilimanjaro, two hundred and forty three. Scenario D, a Denali with five lines: nine hundred and ninety a month. Now compare B and C with me. Same volume, different shape, different rank, different pay. Which of these four looks most like the organization you would build?

THE PRINCIPLE

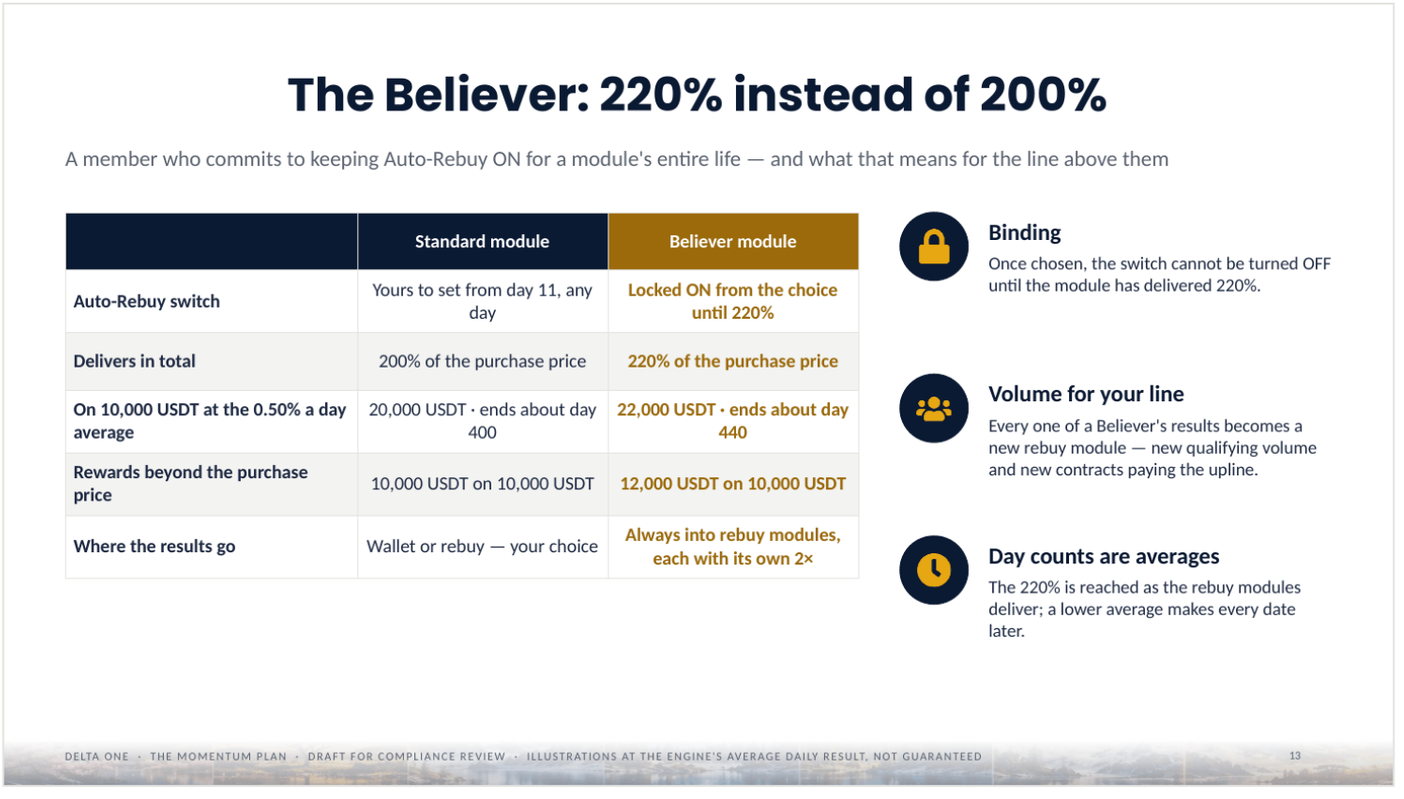

Small, honest numbers build more trust than big ones. Use the B-versus-C comparison to teach the line rule a second time.

WELCOME THE QUESTION

“These numbers look small.” They are honest, and I'd rather show you honest numbers than impressive ones. They are monthly figures at the average, for small organizations, and your own module's result comes on top. The larger organizations are worked through in the Distributor Guide.

LISTEN

Aria narrates this slide · 40 s — click the paperclip (attached MP3)

WHAT TO SAY

The Believer. A member who commits to keeping Auto-Rebuy on for a module's entire life receives two hundred and twenty percent instead of two hundred. On ten thousand USDT at the average, that is twenty two thousand instead of twenty, ending at about day four hundred and forty. The choice is binding: the switch stays locked on until the module has delivered the full two hundred and twenty percent. And for your line, every one of a Believer's results becomes a new rebuy module: new volume and new contracts paying the upline. It is a choice for the patient, and the plan pays patience. Is that a choice you'd make for yourself?

THE PRINCIPLE

Present the Believer as a decision, with both sides: more in total, no way back. Let the prospect decide; never decide for them.

WELCOME THE QUESTION

“Can a Believer change their mind?” No. Once chosen, the switch cannot be turned off until two hundred and twenty percent has been delivered. That is why I'd only suggest it for a module you are certain you won't need to draw on.

LISTEN

Aria narrates this slide · 35 s — click the paperclip (attached MP3)

WHAT TO SAY

Six rules, and I'm going to ask you to repeat them back to me, because the people who remember these are the people who succeed. One: paid on earnings, never on purchases. Two: no profit, no payout. Three: balance your lines. Four: stay ahead. Five: modules end at two times, and only active modules count. Six: everything is paid daily, in USDT on BNB Smart Chain, at the noon UTC settlement, to your app wallet, where you can withdraw from five USDT with only the network fee. Which of the six do you think most people forget?

THE PRINCIPLE

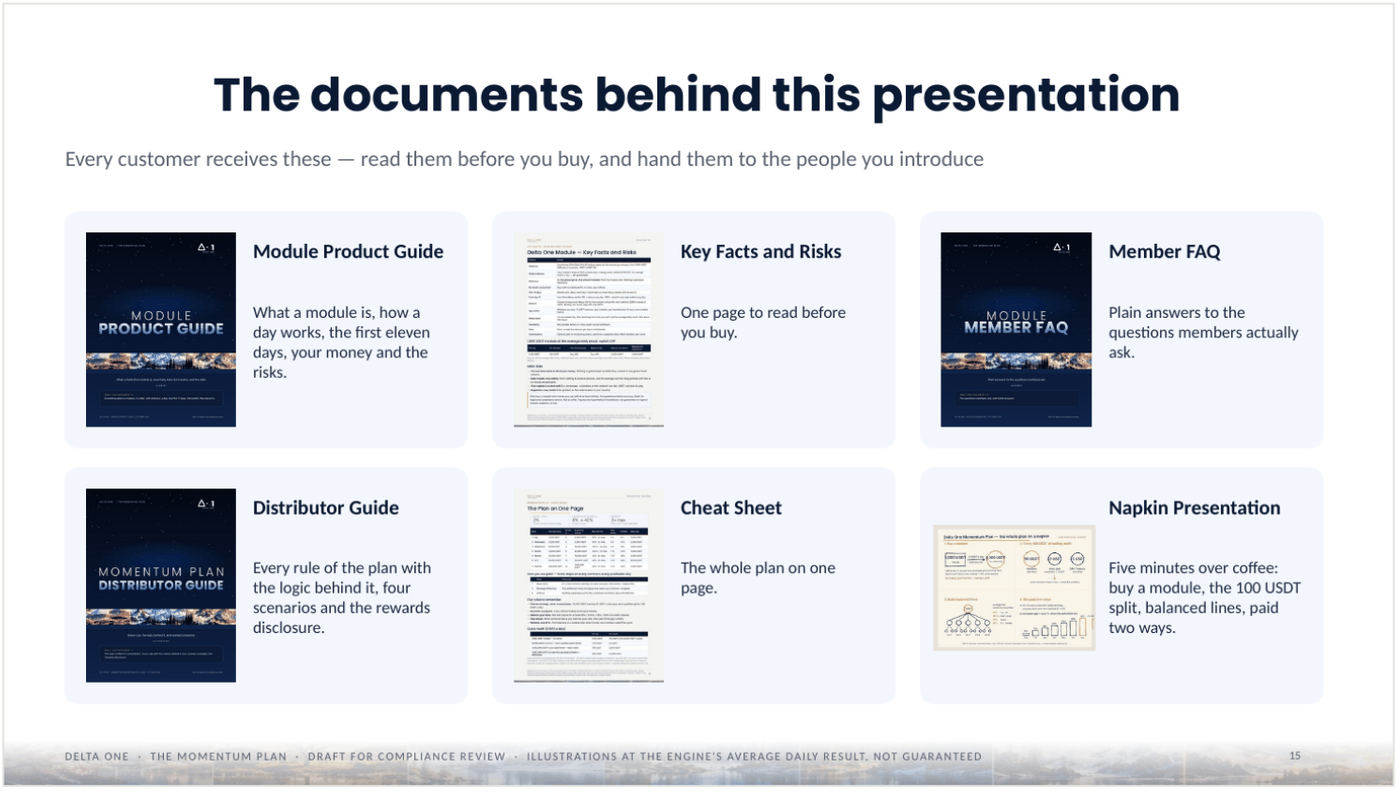

Repetition with participation. A rule the prospect says out loud is a rule they will keep.

WELCOME THE QUESTION

“When exactly am I paid?” Every day at twelve noon UTC, for the previous day's profit, straight into your app wallet. Withdrawals are instant, five USDT minimum, gas fee only. Daily pay, no waiting for month end.

LISTEN

Aria narrates this slide · 32 s — click the paperclip (attached MP3)

WHAT TO SAY

Everything I've shown you is written down, and I'd like you to read it. Your customers read the module product guide, the one page key facts, and the member FAQ before they buy. For your team there is the distributor guide with every rule and scenario, the cheat sheet on one page, and the napkin presentation for five minutes over coffee. Here is my suggestion: read the key facts tonight, it is one page, and the product guide this week. Then call me with your questions. May I send you both right now?

THE PRINCIPLE

Ask for a small, specific next action with a time attached. Small commitments lead to big ones.

WELCOME THE QUESTION

“Which one do I send first?” The one page key facts, always. Then the product guide. A prospect who has read both has no surprises, and a prospect with no surprises stays.

LISTEN

Aria narrates this slide · 28 s — click the paperclip (attached MP3)

Speaker edition — for distributors, not for prospects. Illustrations at the engine's 0.50–1.00% average daily result; days vary from zero to several percent. Not a guarantee of earnings. Capital at risk.
Draft for legal and compliance review. Result and income figures require compliance approval before external use. Not legal, tax or financial advice.

WHAT TO SAY

And now the fine print, which I read in full, every time, because it protects you and it protects me. Every figure is a hypothetical illustration at the engine's average daily result. Days without profit pay nothing, and the average can change. Results and rewards are not guaranteed. Most members earn no commission at all. A module is a software purchase, not a deposit; the purchase price is not refundable, and the amount can be lost in whole or in part. Programs like this are regulated in many countries. Nothing here is legal, tax or financial advice. Only purchase with money you can afford to lose entirely. Is there anything on this page you'd like me to explain?

THE PRINCIPLE

The professional reads the disclosure with the same confidence as the benefits. Honesty is not the opposite of selling; it is the foundation of it.

WELCOME THE QUESTION

“Do I really have to read all of that?” Yes, every time, and I'll tell you why: compliance approval of these figures and your reading of the disclosure are what make this a professional business instead of a promise. The people you introduce deserve the same.

LISTEN

Aria narrates this slide · 40 s — click the paperclip (attached MP3)

WHAT TO SAY

Three sentences to take with you. Build wide. Stay ahead. Tell the truth about the risks. That's the whole plan, and it is also the whole profession. Thank you for your time and your attention. The documents are yours to keep, and I'm ready for your questions. So let me ask you the only question that matters: what would you like to do next?

THE PRINCIPLE

Close with a question, then be quiet. The next person to speak decides what happens next; let it be them.

WELCOME THE QUESTION

“What is the next step?” Read the key facts and the product guide, ask me every question you have, and only then decide on a module size you could afford to lose. Shall we put a time in the diary for those questions?

LISTEN

Aria narrates this slide · 19 s — click the paperclip (attached MP3)
